PROFESSIONAL SUMMARY

Business Systems & Data Analytics Analyst with experience developing SQL-driven reporting systems and Power BI dashboards that improve operational visibility and decision making. Skilled at translating business problems into technical solutions through data modeling, requirements gathering and analytics. Experience supporting enterprise systems, stakeholders, and data driven initiatives within large scale operational environments.

EXPERIENCE

Marathon Petroleum Company - Business Systems Analyst Intern | *Findlay, OH | May 2025 – August 2025*

- Developed an automated Power BI dashboard integrating SQL data to support the Heartland-to-FISERV migration, replacing manual Excel tracking, enabling stakeholders to identify missing MAG transition data across 8,000 locations while saving approximately 5 hours of manual work weekly within a $30B annual settlement environment.
- Ensured and strengthened data integrity and PCI compliance by enhancing Power BI refresh, access and validation logic, achieving 99% accuracy and reducing manual reporting by 90%.
- Analyzed 167 customer incidents related to the Credit Card Summary issue, quantifying over $200k in support costs and translating qualitative feedback into measurable business impact metrics for leadership.
- Led an 8-person cross-functional team to build a Salesforce business case, defining KPIs, communicating operational risk, and securing executive buy-in to restart the project stalled for 2 years.
- Designed user stories and acceptance criteria in Azure DevOps using Agile methodology to guide development of the Credit Card Summary rebuild.

Spartan Chemical Company - IT Intern | *Maumee, OH | October 2024 – March 2025*

- Audited purchasing datasets that disrupted reporting accuracy, improving data clarity and decision making for the purchasing team. Leveraged SQL Server Management Studio to clean datasets and develop stored procedures to supply reports with accurate, ready-to-use information.
- Designed stored procedures and automated reports using Microsoft Report Builder, enabling teams to retrieve accurate product and order information without manual searches.
- Collaborated with the systems analysts and end users to gather reporting requirements, ensuring solution balanced technical accuracy and usability for operational teams.

Rocket Wireless - Telecom-Cellular Telephone Coordinator | *Toledo, OH | April 2023 – April 2024*

- Resolved customer phone issues, from system updates, number changes to account modification, by prioritizing cases and documenting complex workflows for smooth services service.
- Reduced service errors by creating step-by-step guides for recurring technical tasks, helping staff and customers navigate complex processes.

SKILLS

Technical & Analytics: SQL, Power BI (DAX, dashboards, automation), Tableau, Excel (advanced formulas, modeling), Python, Data Visualization, Data Mining, Descriptive & Prescriptive Analytics, ETL

System & Data Analytics: Business Systems Analysis, Requirements Gathering, Data Modeling, Database Design, Process Improvement, Agile/SDLC, Use Case Analysis

Enterprise & Execution: SAP (MM, PP, SD), Project Planning & Scheduling, Azure DevOps, Salesforce Platform, ServiceNow, Power Automate

Design & Reporting: Figma (UI/UX), Project Coordination, Technical & Business Reporting

CERTIFICATION

- CompTIA IT Fundamentals Pro+ Certified

PROJECTS

Gym Management Database System | *Microsoft SQL Server, Power BI*

- Designed and implemented a relational SQL Server database to support a gym's transition from manual tracking to a centralized digital system.
- Developed relational schema, reporting views, and stored procedures to consolidate operational and revenue data for analytics.
- Built Power BI dashboards to monitor membership growth, subscription performance, and revenue KPIs for executive reporting.

Cinewave User Behavior Analytics System (In Progress) | *Microsoft SQL Server, Power BI*

- Designing a behavioral analytics system modeling streaming platform engagement and subscription conversion patterns.
- Developing event-driven SQL queries to analyze retention, user engagement funnels, and upgrade drivers.
- Building BI dashboards to visualize engagement metrics and subscription performance trends.
- Leveraging AI-augmented analytics exploration and query optimization to accelerate behavioral data analysis workflow.
- Simulates streaming platform user behavior through event-driven data modeling to analyze engagement, retention, and subscription upgrades.

EDUCATION

University of Toledo - B.B.A in Management Information Systems, Minor in Financial Data Analysis | *Toledo, OH* | *May 2026*
GPA: 3.6 / 4.0

EXTRACURRICULAR

Minority Professionals in Business (MPIB)

Treasurer | September 2024 – Present

- Managed $1,000 in organizational finances and budgeting
- Collaborated with executive board to plan events and initiatives that promote inclusion and career readiness.
  Mentor for Young Executive Scholars (Y.E.S.) Program – Jones Leadership Academy where I discussed college preparation, career pathways, and leadership in business, helping students build confidence in pursuing high education.
